

Glemco offers a heavy process upgrade kit for the EMER, that is designed to enhance performance and improve productivity with these advancements...

### > Added Isolation

Redesigned insulating washers features an extended surface area that prolongs coating and eliminates shorting. The insulators completely cover the buss wire connection and come with threaded caps for easier service removal.

### Decreased Particles

Industry standard Teflon® coated, Tin plated Copper wire is prone to coating and shorting which causes particles. Glemco has eliminated **Teflon®**, **Tin** and **Copper** from the assembly and uses a robust and reusable solid Tantalum buss wire to deliver up to 5Kv to the inner electrode in the upgrade kit.

## Leak Shield

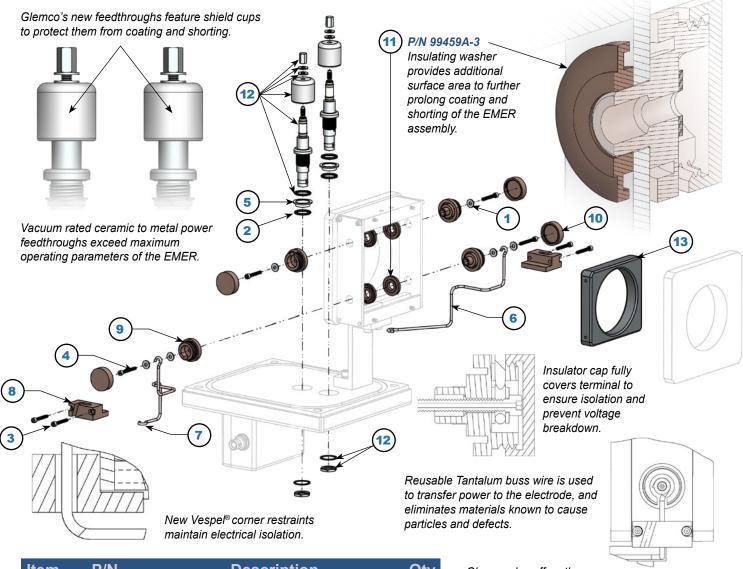

A strong vacuum rated seal is provided by ceramic power feedthroughs. An aluminum shield cup protects Glemco's new feedthrough from process material.

# Optimal Efficiency

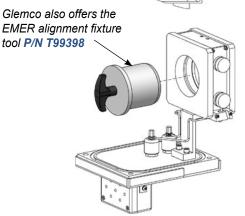

All components are rated for heavy processing at maximum operating parameters of the EMER assembly.

# K99398UP2 - Universal Heavy Process EMER Upgrade Kit

| Item | P/N      | Description                            | Qty |
|------|----------|--|-----|
| 1    | 82456    | #4 Narrow Washer, SST                  | 6   |
| 2    | 82914V   | - 014, O-Ring, Viton®                  | 2   |
| 3    | 8B287    | SHCS, 4-40 X 3/4", Vented, SST         | 6   |
| 4    | 8B307    | SHCS, 4-40 X 7/8", Vented, SST         | 2   |
| 5    | 99398-6  | Insulator Feed-Thru Connector, Delrin® | 2   |
| 6    | 99398-12 | Feed Wire A, Tantalum                  | 1   |
| 7    | 99398-13 | Feed Wire B, Tantalum                  | 1   |
| 8    | 99398-14 | Corner Restraint, Vespel®              | 2   |
| 9    | 99459A-1 | Bias Ring Aperture Insulator, Vespel®  | 4   |
| 10   | 99459A-2 | Insulator Cap, Vespel®                 | 4   |
| 11   | 99459A-3 | Insulating Washer, Vespel®             | 4   |
| 12   | 99464B   | Feed-Thru Assembly                     | 2   |
| 13   | 99577    | Aperture, Graphite                     | 1   |
